

4 Courses

Advanced Django: Building a Blog

Advanced Django: Introduction to Django Rest Framework

Advanced Django: Advanced Django Rest Framework

Advanced Django: External APIs and Task Queuing

Jul 24, 2022

Marco Antonio Parra Fernández

has successfully completed the online, non-credit Specialization

Advanced Django: Mastering Django and Django Rest Framework

This specialization is intended for people who are interested in taking their web development with Django to the next level. It is assumed that learners have are familiar with Python and have taken the Django for Everybody specialization, or have equivalent experience with Django basics. In these four courses, you will cover everything from the architecting of large web development projects, to the Django REST framework, to task queuing. These topics will prepare you to create advanced websites that integrate with popular APIs and popular JavaScript frameworks, giving you enough understanding of Django to tackle more specialized projects.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
